

VSE's Clear Coat for Boats

I have a 1988 Cobia 27' Odyssey that has shown its age in fading colors and not being able to maintain any shine for an entire season. After one coat of the VSE Clear Coat, the boat color has been restored to a "like new" condition and continues to maintain its shine. The employees from the Marina that store my boat asked if I found a way to get a new gel coat applied the difference was so drastic and looked like a new boat again. Even after winter storage, the boat shows no difference in appearance and is ready to be launched without having to spend the extra time prepping the boat to improve the appearance for the launch date. I would recommend this VSE Clear Coat service to anyone that owns a boat.
